PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building scalable web and mobile applications. Skilled in developing responsive UIs, integrating backend solutions, and managing cloud databases. Experienced in cross-platform mobile development, CI/CD automation, and optimizing performance in Agile environments.

EXPERIENCE

Prefeitura Municipal de Ji-Paraná   **April 2023 – January 2024**
Software Developer and Technician   *Ji-Paraná, RO*

- Architected and produced a Full Stack computer ID management system using JavaScript (ES6+), PHP, and MySQL, improving workflow automation by 65%. Migrated from AWS RDS to Hostinger MySQL using phpMyAdmin, centralizing the system for better organization.
- Automated repetitive IT support tasks using Python scripting, reducing error rates and improving technician productivity by 30%. Implemented a cross-platform GUI-based automation tool for batch processing, printer spooler management, and system administration tasks.
- CI/CD deployment with GitHub Actions, automating the platform update via FTP, reducing the time to deploy by 40% and releasing more smoothly and reliably.

PROJECTS

AcademicHub – Chat with Students!   github.com/caiohenrqq/AcademicHub

- Developed a mobile app as part of a 4-person team over a 6-month semester, completing the project in just 3 months. The app allows university students to create and join real-time topics and discussions. It achieved an 80% public approval rating for its intuitive user interface and seamless user experience. Integrated Firebase Firestore (NoSQL) for real-time message synchronization and used Google authentication for easy login.

Stack: Ionic, React with TypeScript, Capacitor, Firebase and Firestore (NoSQL), Vite, deploy with Vercel and Figma.

EDUCATION

Centro Universitário São Lucas   **2023 - 2026**
Bachelor's degree in Computer Science   *Ji-Paraná, RO*
- Expected Completion: July 2026
- Activities: Participated in collaborative projects with courses, applying programming skills to solve practical problems and present solutions to the public.

SKILLS

Frontend: React, JavaScript (ES6+), TypeScript, HTML, CSS, Bootstrap, jQuery, Choices.js, Ionic, Figma
Backend: PHP, MySQL, NoSQL (Firebase/Firestore), RESTful APIs, Node.js, Java, Python
Cloud & DevOps: AWS RDS, Firebase, CI/CD (GitHub Actions), Hostinger, Linux Server Administration
Other: Agile Methodologies, Performance Optimization, Database Management, Cross-Platform Development
